SPECIFIC COMMENTS TO AUTHORS

To Authors The manuscript is an interesting presentation of a therapeutic means and perspectives in the field of the neurosurgery. Based on the characteristics of the manuscript, the possible readers of the article should be, in my opinion, not specialized in this specific section. Consequently is useful to subdivide the argument in some

specific sections in which the radiotherapy can be employed in the treatment of the neurological lesions, with pathology, indications, technical features, outcomes. For example of some confusion, in the introduction there is a description of a specific neurosurgical technique and it's difficult to understand the purpose of this choice. In summary I think that should be necessary to rewrite the article.

SPECIFIC COMMENTS TO AUTHORS

The manuscript "A summary of Radiosurgical Techniques" by Velnar and Bosnjak is interesting and clear, it deals with the relevant issue of Radioneurosurgery, although, it consists in a wide review it could be useful both, for students and for non-experts in Neurosurgery. I have only a suggestion, the title should indicate that the manuscript

deals with brain radiosurgery and mostly with brain neoplasms. Although a brief mention is made on functional radiosurgery (epilepsy and movement disorders on P7,p2,L1-3; pages are not numbered difficulting this review) however, most contents of this manuscript are related to brain neoplasms.
