SPECIFIC COMMENTS TO AUTHORS

The manuscript is well written and English is fluent. Because this study is only superficial investigation for factors and similar articles are numerous, the creativity is lowered. Only a few typing defects or doubts require clarification: 1. In Abstract,

Methods: LOS should be fully spelled. 2. In Ref. 16: J Bone Joint Surg (Am)?   3. In Table 1: last column, hr: min? 4. The statistical methods should be explained in the text of Methods and how to read in Results. In Table 2: Why Constant has p-value of 0.004? It was not mentioned in the text.   5. In Table 2: the value is different from the Results. For female (0.011 or 0.012), for surgery end time (0.004 or 0.040)?
