Biostatistics Review certificate

Name of Journal: World Journal of Gastroenterology

Manuscript NO: 42122

Title: The economic evaluation of the Hepatitis C elimination strategy in Greece in the era of affordable DAAs

Authors List: Ilias Gountas, Vana Sypsa, George Papatheodoridis, Kyriakos Souliotis, Kostas Athanasakis, Homie Razavi, Angelos Hatzakis

I certify that I have reviewed the statistical methodology of this study and, to my knowledge, all statistical methods and techniques seems appropriate for this research. The authors have already published the methodology to estimate disease burden (ref 20, 21 of the manuscript). In this manuscript, the authors have expanded the previously published methodology to also include economic evaluation of a strategy that could lead to hepatitis C elimination.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Gioti'.

Giota Touloumi

Professor of Biostatistics and Epidemiology

Department of Hygiene, Epidemiology and Medical Statistics

Medical School, National and Kapodistrian University of Athens
