Basic Study
Economic evaluation of the Hepatitis C elimination strategy in Greece in the era of affordable direct-acting antivirals

Gountas I *et al.* Cost-effectiveness of HCV elimination in **2** Greece

Ilias Gountas, Vana Sypsa, George Papatheodoridis, Kyriakos Souliotis, Kostas Athanasakis, Homie Razavi, Angelos Hatzakis

Abstract
BACKGROUND
Hepatitis C virus (HCV) is a leading cause of liver-related morbidity and mortality worldwide. World Health Organization released an integrated strategy targeting HCV-elimination until 2030. This study aims to estimate the required interventions to achieve elimination using updated information for direct-acting antiviral (DAA) treatment coverage, to compute the total costs (including indirect/societal costs) of the strategy and to identify whether the elimination strategy is cost-effective/cost-saving in Greece.

AIM
To estimate the required interventions and subsequent costs to achieve HCV elimination in
