SPECIFIC COMMENTS TO AUTHORS

Thanks to authors for presenting interesting article. However, I don't think this study gives us a further scientific knowledge or evidence influencing current medical practice. Also, I don't think the conclusion can be drawn from the results of this study.

SPECIFIC COMMENTS TO AUTHORS

1. The format of this manuscript is not very standard. 2. More clinical features should be include to find more significant results. 3. What is the incidence of acute appendicitis for living liver donors without appedectomy when follow-up in your center? 4. Add typical

images of pathology and surgery.

SPECIFIC COMMENTS TO AUTHORS

The current manuscript's topic is interesting and instrumental significance in clinical practice. But there are some details to be discussed. 1. The authors should explain the precise time point when the parameters were obtained, for example, before or after the

operation. 2. Some patients with appendicitis could be in good condition even if they did not receive operation, thus how many patients developed appendicitis in IA group? It is very important to prove the authors' conclusion 3. The relationship between the parameters and the operation outcome, which should be analyzed. 4. The changes of the parameters may be better than independent comparison.
