SPECIFIC COMMENTS TO AUTHORS

This article represents a very interesting case of a rare condition that was treated successfully. In my opinion this case is a valuable contribution to the common scientific knowledge. However, the authors need to elucidate some points: 1. How did the

previous attending physicians justified leaving a t tube in its place for two years? What was the rationale behind it? 2. How did the authors decide to undertake a radical resection of a locally advanced tumor which was proven to be an adenocarcinoma of biliary origin (with a skin biopsy) considering the very poor prognosis of locally advanced cholangiocarcinomas. Also the article needs heavy language editing. Some parts of the case report section are barely comprehensible.

SPECIFIC COMMENTS TO AUTHORS

This is a nice case report. Minor language revision required. In the discussion, any case of obstructive jaundice, ERCP should be tried first. ERCP with cholangioscopy with biopsy could give early diagnosis.

SPECIFIC COMMENTS TO AUTHORS

This case report is well written and surgical procedure is clearly illustrated. The discussion was good. If this patient who underwent such an extensive surgery could survive with restored nutrition for 2 years, authors are congratulated. It will be

worthwhile to continue observation and if long term survival would be possible, authors should report the long term survival. Comment: The consent form signing should be included under the case report section than in the introduction. Hb 37 g/L, should also be expressed as 3.7 g/dL as most readers are familiar with in other countries.

SPECIFIC COMMENTS TO AUTHORS

Dear Associate Editor, Thank you for sending me the case report for review. It reported a case of biliary papilomatosis with malignant transformation. The tumor extended outside the biliary tract and involved the adjacent organs. There is no data

regarding chemoradiation in this case. Moreover, There is no data regarding post operative recurrence using PET scan or any other imaging modality. Considering the grade of tumor differentiation and tumor behavior he time of follow up is rather short.
