SPECIFIC COMMENTS TO AUTHORS

This review aims to investigate the role of endoscopy in inflammatory bowel disease (IBD). Major points: 1. Information for the role of upper endoscopy and capsule endoscopy in IBD is missing. 2. Information regarding the role of endoscopy on initial diagnosis, assessment of therapeutic response and postoperative follow up in IBD is

SPECIFIC COMMENTS TO AUTHORS

With their paper the Authors aimed at reviewing the role of endoscopy in Inflammatory Bowel Disease with regard to surveillance and management strategies of colorectal neoplasia in IBD. The Authors focused on two main subtitles including endoscopic surveillance and endoscopic resection in IBD patients. The title includes a broad

spectrum and does not summarize what the review is carried out. The title might be "The role of endoscopy in the surveillance and management of colorectal neoplasia in Inflammatory Bowel Disease" instead of "The role of endoscopy in Inflammatory Bowel Disease". The endoscopic surveillance division has been well written, but endoscopic resection section should be more illustrative. In the second section regarding endoscopic therapy the Authors could have gotten that clarification by doing flow chart. After arrangement and preparation according to recommendations, this review is acceptable for publication.
