Analysis of intrahepatic sarcomatoid cholangiocarcinoma: Experience from 11 cases within 17 years

Kim DK *et al.* Analysis of intrahepatic s-CCC

Dong Kyun Kim, Bo Ra Kim, Jin Sook Jeong, Yang Hyun Baek

Abstract

BACKGROUND

Intrahepatic sarcomatoid cholangiocarcinoma (s-CCC) is an extremely rare disease, accounting for less than 1% of hepatobiliary system malignancies, and its pathophysiology is not well known. On the hypothesis that its clinical, serologic, or radiologic diagnosis are not fully understood and its prognosis is poor, we investigated the distinguishing features of s-CCC compared with those of intrahepatic bile duct adenocarcinoma [cholangiocellular carcinoma (CCC)] in patients from a single center.
