Outcomes of per oral endoscopic pyloromyotomy in gastroparesis worldwide

Mekaroonkamol P *et al.* Outcome of POP in Gastroparesis

Parit Mekaroonkamol, Rushikesh Shah, Qiang Cai

Abstract

Per oral endoscopic pyloromyotomy (POP), also known as gastric per-oral endoscopic myotomy (GPOEM), is a novel procedure with promising potential for the treatment of gastroparesis. As more data emerge and the procedure is becoming more recognized in clinical practice, its safety and efficacy need to be carefully evaluated. Appropriate patient selection for favorable clinical success prediction after GPOEM also needs
