SPECIFIC COMMENTS TO AUTHORS

This is a very interesting case of Congenital maxillomandibular fusion which represents a rare anomaly of the craniofacial region. The authors report on a 7-month-old girl with bilateral maxillomandibular syngnathia. We performed bony isolation with

computer-assisted navigation, a first-of-its-kind treatment approach for case of syngnathia. This is a novel method of treatment, efficacious with minimal side effects. Also, the figures are images are artistically very good and explanatory. However, the use of English merits some attention and I took the liberty to edit it linguistically and attach it as a comment for the editor. Yours sincerely
