**Osteoarticular manifestations of human brucellosis: A review**

**Seyed Mokhtar Esmailnejad-Ganji, Seyed Mohammad Reza Esmailnejad-Ganji**

### **Abstract**

Brucellosis is a common global zoonotic disease, which is responsible for a range of clinical manifestations. Fever, sweating and musculoskeletal pains are observed in most patients. The most frequent complication of brucellosis is osteoarticular involvement, with 10 to 85% of patients affected. The sacroiliac (up to 80%) and spinal joints (up to 54%) are the most common affected sites. Spondylitis and spondylodiscitis are the most
