Dear Editor-in-chief,

Thank you for considering our invited original review article entitled “**The evolving role of magnetic resonance techniques in primary sclerosing cholangitis**” for publication in the World Journal of Gastroenterology.

Three reviewers were happy to accept the manuscript in its current form, and we have addressed the minor revisions from the fourth reviewer as requested. These changes have been highlighted in the manuscript.

We look forward to your response.

Yours sincerely,

Dr Michael Pavlides
