

17 August 2013

Dear Editor,

Please find enclosed the edited full-text manuscript in Word format (file name ESPC Manuscript No: 4506.doc).

Title: Coronary CT angiography: state of the art

Author: Akmal Sabarudin, Zhonghua Sun

Name of Journal: World Journal of Cardiology

ESPS Manuscript NO: 4506

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated
2. Revision has been made according to the suggestions of the reviewers:
 - I think their proposal is reasonable-there is a growing body of literature regarding the extensive role and benefits of coronary CT scanning. I think the project that they suggest regarding discussing some of the specifics, including some of the technical aspects, controversies, and practical implications would be of significant interest to those who are involved in managing these patients and ordering these test-but might not be aware of some of nuances of the procedure itself.
 - I written the manuscript and find that there are no issues in this manuscript.

Thank you again for publishing my manuscript in the *World Journal of Cardiology*.

Sincerely yours,

Zhonghua Sun, PhD
