## Successful treatment of nonunion with teriparatide after ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3777162>

May 07, 2013 · These patients were all successfully treated with teriparatide after conservative therapy for nonunion. Alvaro described a case of atrophic humeral shaft nonunion after intramedullary osteosynthesis with elastic nails, and Lee described three cases of femoral nonunion after surgical fixation. Our patient was administered with teriparatide for 12 months after the diagnosis of nonunion.

## Abstract

### BACKGROUND

Femoral shaft fractures are a common type of fracture among adults and have high union rates. However, clinical decisions are difficult to make because of the different types of nonunions. Atrophic nonunion usually requires revision surgery combined with bone grafting. Furthermore, no study of teriparatide administration for femoral atrophic nonunion have been previously reported.

### CASE SUMMARY

A 60-year-old woman had a <sup>1</sup>right femoral shaft fracture due to a traffic accident, and she immediately underwent closed reduction and internal fixation surgery with an
