

REPLY TO EDITORS AND REVIEWERS

We thank the reviewers and the editors for their positive feedback on our manuscript “Endoscopic ultrasound-guided drainage of the biliary system: Techniques, indications and future perspectives” (No 45286)

Reviewer 2 asked to include a section on complications of EUS-BD which we have done in the revised manuscript.

We uploaded two versions of the revised manuscript: 1: version with the changes marked in red and with replies to the editor (uploaded as supplementary material); 2: clean version (uploaded as manuscript file).

Figures and tables were uploaded separately as “image files”. We had to upload the tables as “image files” in word format, we were not able to insert them in the manuscript because of different formatting.

We hope that the revised version is suitable for publication in WGJE and look forward to your reply.

Kind regards

Prof. dr. Pieter Hindryckx
