Per-oral endoscopic myotomy - Wikipedia

https://en.wikipedia.org/wiki/Per-oral_Endoscopic_Myotomy ▾

The **per-oral endoscopic myotomy**, or POEM, is a minimally invasive surgical procedure for the treatment of achalasia wherein the inner circular muscle layer of the lower esophageal sphincter is divided through a submucosal tunnel. This enables food and liquids to pass into the stomach a process that is impaired in achalasia.

The Pathogenesis and Management of Achalasia: Current ...

www.ncbi.nlm.nih.gov › ... › Gut Liver › v.9(4); 2015 Jul

Jul 23, 2015 · 4. Peroral **endoscopic myotomy**. Peroral esophageal **myotomy** (POEM) is a recently developed **endoscopic** technique for treatment of patients with achalasia. 119 The procedure involves **endoscopic** submucosal dissection with creation of a submucosal plane using a forward-viewing endoscope to access the circular muscle fibers for performance of the
