To the reviewers of the World Journal of Hepatology

March 16, 2019

Dear sirs:

Thank you for your valuable considerations regarding our manuscript. Regarding the suggestions on how to improve this article for publication, I am sorry to inform that, other than the picture already attached to the report, there are no further pictures of the skin lesion at presentation or after the treatment. However, I was able to obtain high quality images showing the histological features of the leukocytoclastic vasculitis, and an image of the computerized tomography scan showing bowel edema. I believe the inclusion of these pictures will improve the manuscript along the lines suggested by the reviewers.

Thank you for your consideration!

Sincerely,

Gustavo de Sousa Arantes Ferreira, Department of Liver Transplantation, Instituto de Cardiologia do Distrito Federal
