Cardiac amyloidosis: A case report and review of literature

Adeyemi Adedamola Taiwo, Lavanya Alapati, Assad Movahed

Abstract

Cardiac amyloidosis, a disease caused by the precipitation of amyloid proteins in the myocardial extracellular matrix has been historically difficult to diagnose due to lack of specific clinical manifestations and necessity of biopsy to demonstrate amyloid

This case report describes cardiac symptoms as a dominating feature in the clinical picture of newly diagnosed systemic AL amyloidosis. The definitive diagnosis was confirmed microscopically following endomyocardial biopsy. Subsequently, systemic chemotherapy was initiated as the basic treatment for systemic AL amyloidosis.
