Use of Spring Plates in Fixation of Comminuted Posterior ...

<https://journals.lww.com/jorthotrauma/Pages/ArticleViewer.aspx?year=2018&issue=02001&...>

Objectives: Surgical management of comminuted **posterior wall acetabular fractures** with marginal fragments remains difficult. The purpose of this **study** was to evaluate the use of spring **plates** as adjunctive fixation in comminuted **posterior wall acetabular fractures**. Methods: A retrospective review of patients treated for **posterior wall acetabular fractures** with the use of customized spring ...

Comparative Study of W-Shaped Angular Plate and ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3954867>

Comparative **Study** of W-Shaped Angular **Plate** and **Reconstruction Plate** in Treating **Posterior Wall Fractures** of the **Acetabulum**. ... Although the use of spring **plates** beneath a **buttress plate** can be an option for the fixation of comminuted **posterior acetabular wall fractures**, ... **Reconstruction of posterior wall fractures** of the **acetabulum**, in ...

Acetabular Fractures - Trauma - Orthobullets

<https://www.orthobullets.com/trauma/1034/acetabular-fractures> ▾

patients older than 60 years have approx. a 30% late conversion rate to THA after **acetabular fractures**; 10-year implant survival ... • access to quadrilateral **plate** to **buttress** comminuted medial **wall fractures** • Corona mortis must be exposed and ligated in this approach ... A 47-year-old male sustains an isolated **posterior wall acetabulum** ...

(PDF) The use of buttress plates in the management of ...

https://www.researchgate.net/publication/280327665_The_use_of_buttress_plates_in_the...

The primary aim of this **study** was to report on the mid-term outcomes after quadrilateral **plate reconstruction** of **acetabular fractures** using a **buttress/spring plate** through an ilioinguinal approach.

Biomechanical Comparison of Different Stabilization ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3876999>

Purpose. Operative treatment of unstable **posterior wall fractures** of **acetabulum** has been widely recommended. This laboratory **study** was undertaken to evaluate static fixation strength of three common fixation constructs: interfragmentary screws alone, in combination with conventional **reconstruction plate**, or locking **reconstruction plate**.
