## Function and Regulation of Tumor Necrosis Factor Receptor ...

[https://www.researchgate.net/publication/8429516\\_Function\\_and...](https://www.researchgate.net/publication/8429516_Function_and...)

Tumor necrosis factor  $\alpha$  (TNF $\alpha$ ) is a pleiotropic cytokine which signals through TNF receptor 1 (TNFR1) and TNF receptor 2 (TNFR2).

## Tumor necrosis factor- $\alpha$ promotes the lymphangiogenesis of ...

[www.ncbi.nlm.nih.gov](http://www.ncbi.nlm.nih.gov) > ... > **Cancer Sci** > v.105(10); 2014 Oct

Detection of clinical specimens. Tumor necrosis factor- $\alpha$  and VEGF-C level in the bile specimens from 20 GBC patients and 20 patients with cholesterol gallbladder polyps were assessed by ELISA, and lymphatic vessels density (LVD) of 20 GBC specimens were detected with D2-40 antibody by immunohistochemistry.

## Tumor necrosis factor- $\alpha$ -induced apoptosis of gastric ...

<https://www.sciencedirect.com/science/article/pii/S0003986114004056>

The role of the inhibitor of apoptosis (IAP) family members in tumor necrosis factor- $\alpha$  (TNF- $\alpha$ )-induced apoptosis of human gastric cancer MKN28 cells was explored. TNF- $\alpha$  induced up-regulation of cIAP2, whereas cycloheximide (CHX) induced down-regulation of XIAP and survivin.
