The role of infrapatellar fat pad in the pathological process and its future treatment prospect on knee osteoarthritis

Jiang LF *et al.* IPFP and OA

Li-Feng Jiang, Jing-Hua Fang, Li-Dong Wu

Abstract

It has been found that obese people have a higher proportion in suffering from osteoarthritis (OA), not only in the weight-bearing joints like knee and

[Hoffa's fat pad abnormalities, knee pain and magnetic ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4877349>

Mar 21, 2016 · Hoffa's (infrapatellar) fat pad (HFP) is one of the **knee fat pads** interposed between the joint capsule and the synovium. Located posterior to patellar tendon and anterior to the capsule, the HFP is richly innervated and, therefore, one of the sources of anterior **knee** pain.
