Repurposing drugs to target nonalcoholic steatohepatitis

Sookoian S *et al.* NASH drug discovery

Silvia Sookoian, Carlos J Pirola

Abstract

Nonalcoholic fatty liver disease (NAFLD) is a complex disorder that has evolved in recent years as the leading global cause of chronic liver damage. The main obstacle to better disease management pertains to the lack of approved pharmacological interventions for the treatment of nonalcoholic steatohepatitis (NASH) and NASH
