

Responses to the Editor:

Manuscript NO: 45981

Title: Optimal Use of the Fielder XT Guidewire Enhances the Success Rate of Chronic Total Occlusion Percutaneous Coronary Intervention

SPECIAL COMMENTS RELATED TO YOUR SUBMISSION FROM THE ASSISTANT EDITOR:

Signed Informed Consent Form(s) or Document(s)

Please upload the primary version (PDF) of the Informed Consent Form that has been signed by all subjects and investigators of the study, prepared in the official language of the authors' country to the system; for example, authors from China should upload the Chinese version of the document, authors from Italy should upload the Italian version of the document, authors from Germany should upload the Deutsch version of the document, and authors from the United States and the United Kingdom should upload the English version of the document, etc.

Response: Thank you very much for your helpful suggestions. Patients were not required to give informed consent to participate in the study because the analysis used anonymous clinical data that were obtained after each patient agreed to treatment by written consent.
