

Answers to the editors

Line 5: Title was changed accordingly to **reviewer 1** comment.

Lines 56-57: Aim of the study was added accordingly to **reviewer 3** request. Personally, I am not sure if it is appropriate for a case report paper, living the decision whether to include it or not to the editors.

Lines 74-80: Core tip was added accordingly to **science editor's** request.

Lines 91-94: This paragraph also was added because requested by **reviewer 3**. The article he asked to cite is extremely interesting but not really on-topic. So a different source was chosen.

Lines 103-104: Again, Aim of the study was added accordingly to **reviewer 3** request. Still, I am not sure if it is appropriate for a case report paper, living the decision whether to include it or not to the editors.

Lines 107-159: This section was re-organized accordingly to **science editor's** request. Please note we moved final diagnosis session after treatment because it was obtained histologically, from surgically retrieved samples. If you don't feel it was appropriate feel free to move it back.

Line 477: clinical relevance was added because requested by **reviewer 3**.

Lines 482-648: The references section was checked and completed after the **science editor's** request.
