Foreign object ingestion and esophageal food impaction: An update and review on endoscopic management

Brian M Fung, Seth Sweetser, Louis M Wong Kee Song, James H Tabibian

Abstract

Foreign body ingestion encompasses both foreign object ingestion (FOI) and esophageal food impaction (EFI) and represents a common and clinically significant scenario among patients of all ages. The immediate risk to the patient ranges from negligible to life-threatening, depending on the ingested substance, its location, patient fitness, and
