A protocol-driven approach to early extubation after heart ...

<https://www.sciencedirect.com/science/article/pii/S0022522313012531>

A 1998 study by Michalopoulos and colleagues 12 showed that certain anesthesia and sedation regimens could improve early extubation performance after CABG. A 2009 study by Sato and colleagues 20 evaluated the effects of a standardized early extubation protocol on 485 on-pump CABG patients and found that early extubation could be performed successfully. The postoperative protocol in that study ...
