SPECIFIC COMMENTS TO AUTHORS

The case presented even if it refers to a non-usual GN site does not present conceptual novelties or substantially new technical aspects but confirms that the laparoscopic technique offers important advantages compared to other techniques. It would be more interesting given the percentage of complications and that, as mentioned, morbidity and

SPECIFIC COMMENTS TO AUTHORS

The authors describe an uncommon tumour in an unusual location, it's diligent work up and it's successful laparoscopic management with excellent results. The article is well written and merits consideration for publication. There are a few minor comments that need to be addressed before acceptance. 1. How do the authors explain the occurrence of

diarrhea and the worsening of symptoms related to motion? This could be commented upon in the discussion 2. Radiation of the epigastric tenderness to the back is not understood. 3. The word 'dismissed' may be replaced by 'discharged'. 4. There are a few grammatical errors that can be addressed at the proofing stage.
