Dear Editor of World Journal of Clinical Cases

**Manuscript NO.:** 46366

Enclosed please find the Article “**Electrohydraulic lithotripsy and rendezvous nasal endoscopic cholangiography for common bile duct stone: a case report**”, which we wish to submit for possible publication in World Journal of Clinical Cases.

In response to the valuable comments submitted by the reviewers, this manuscript has been revised. Thank you for your kind consideration of our submission, and we look forward to any additional feedback you may have.

Your sincerely,

Koichi Kimura, MD,  
Department of Endoscopy and Endoscopic Surgery  
Fukuoka Dental College  
Fukuoka, Japan

## **Revised points:**

We appreciate the time that the reviewers spent reading and revising our manuscript. Thank you for the reasonable comments, which should strengthen this manuscript.

### **Reviewer: 1**

We thank the reviewer for the important comments. We are sure that they have strengthened this manuscript.

**1. I would like to congratulate the authors for their case. Further demonstration of the possibilities of minimally invasive treatment that can benefit patients at all ages with lower morbidity and mortality. The only placement I make is to reduce the size of the conclusion. I suggest leaving the sentence from the word that was used "in conclusion".**

We agree with this comment. We have reduced the following sentence “In conclusion, huge CBD stone lithotomy may be safely completed by direct peroral cholangioscopy using a nasal endoscope with the rendezvous technique following reduction of the stones with EHL.”

### **Reviewer: 2**

We thank the reviewer for the kindhearted comments.
