Conduit necrosis following esophagectomy: An up-to-date literature review

Antonios Athanasiou, Mairead Hennessy, Eleftherios Spartalis, Benjamin HL Tan, Ewen
A Griffiths

Abstract

Esophageal conduit ischaemia and necrosis is an uncommon but devastating complication of esophagectomy and remains one of the most challenging issues in surgical practice. The incidence, time interval to develop symptoms, and clinical presentation are highly variable with no predictable pattern. Evidence comes from case
