### Advances in the Surgical Treatment of Neuroblastoma ...

<https://www.sciencedirect.com/science/article/pii/B9780128120057000102>

The controversy surrounding the efficacy of primary **tumor resection** in patients with **advanced-stage** disease continued into the 2010s. In 2014, multiple studies were published showing that high-risk, **stage 4 neuroblastoma** patients have increased event-free survival after undergoing primary **tumor resection**. **Surgery** has an even more important role in low-risk and intermediate-risk diseases.
