## Plasma cell neoplasms: Review of disease progression and ...

<https://www.sciencedirect.com/science/article/pii/S0960740405000216>

**Plasma cell neoplasms** are generally categorized into four groups; multiple **myeloma** (MM), solitary plasmacytoma of the bone (SPB), **plasma cell leukemias**, and **extramedullary plasmacytomas** (EMP). A **plasmacytoma** is defined as any discrete, usually solitary mass of **neoplastic plasma cells**, either in the bone marrow or in various soft tissue sites.
