

Reviewer ID: 03655859:

- Point number 1 and 2, a brief note regarding the date of introduction of pancreatic transplantation was mentioned in the abstract. Regarding the drop in pancreatic transplantation, this is probably attributed to improved results from insulin-based therapy, strict recipient selection criteria and the availability of minimally invasive islet cell transplantation option.
- Regarding point number 3, the role of kidney biopsy in cases of suspected pancreatic rejection was mentioned in the algorithm in figure 5.
- Regarding point number 4, the appropriate approval for the used figures was secured
