SPECIFIC COMMENTS TO AUTHORS

From time to time a Review concerning state of the art surgery for pancreatic head carcinoma is necessary. However, to find relevant informations in this Review is very boring. Wheter in the Abstract nor highlighted in the text the Reader finds the main Messages. Thus this paper is not superior to many others dealing with the same theme.

SPECIFIC COMMENTS TO AUTHORS

This review revisits what has already been published in literature repeatedly. No new thoughts are published. No new insights are provided. No new research is presented. Thus the reason for such a manuscript in the present time seems unclear. If the authors sincerely wish to review a topic, they should carry out a systematic review or

SPECIFIC COMMENTS TO AUTHORS

1 In the department of introduction, the author should list the defects of the past techniques in more details. ISH and IHC should be given the full name, not the abbreviation at the first time in the article. 2 It may be better if the research had the results of ISH and IHC to compare that of the dPCR and qPCR.

SPECIFIC COMMENTS TO AUTHORS

The article reviews the clinical issues of the pancreatic cancer. The issues on the lymph node dissection, metastasis and complications are widely reviewed and discussed. This review lacks a perspective for the therapy of pancreatic head adenocarcinoma in the future. The authors stated neoadjuvant therapy in the sections. Some sound like future

treatment. Improvement of outcome of pancreas head adenocarcinoma will be achieved by multiple factors, and the authors needs to state the insight how it will be accomplished. The manuscript is redundantly long. The description needs to be concise. The abbreviations PAC and PHAC are confusing. The first part of Introduction sounds confusing. The epidemiological data of both PAC and PHAC are described. The introduction is redundantly long. The description needs to be concise. The reviewer wonders if the description on Halsted is necessary. Page 11: The description on the study by Nakao is not understandable. Interpreted description on type A-D disease may be helpful for readers. There are many strange sentences and wordings. The manuscript needs thorough revision.
