Primary neuroendocrine tumor of the sacrum: Case report ...

https://www.researchgate.net/publication/24271876_Primary...

A review of the literature revealed 20 case reports of neuroendocrine tumors arising from the presacral region (with or without associated tailgut cyst or sacrococcygeal teratoma) and sometimes ...

Primary presacral neuroendocrine tumor associated with ...

www.ncbi.nlm.nih.gov › ... › World J Surg Oncol › v.5; 2007

Background. Only a handful of primary presacral NETs have been reported in the literature and are felt presumably to derive from hindgut rests, especially given their histopathologic similarity with primary rectal NETs [2]. We report a rare case of a primary presacral NET in a patient with a history of imperforate anus,...

primary malignant neuroendocrine tumor of the pre-sacral region has not been described with a focus on the imaging findings. Therefore, we report an extremely rare case of primary well-differentiated neuroendocrine carcinoma of the presacral region. Case Report A 65-year-old man visited the hospital with severe coc-cyx pain during sleep.

Apr 10, 2009 - One other case involved a primary carcinoid tumor located within the sacral dural sac and subsequently extending to the sacrum, the presacral region, and the rectal wall [29]. Histologically, the majority of these tumors were well-differentiated neuroendocrine tumors ("carcinoid tumor").
