## [Uptake of testing for germline BRCA mutations in patients ...](#)

<https://ijgc.bmj.com/content/early/2019/05/15/ijgc-2019-000389> ▼

May 16, 2019 · Introduction **Patients with non-mucinous epithelial tubo-ovarian cancers** should be referred for genetic testing because approximately 15% will carry an inherited **mutation** in the BRCA1 or **BRCA2 cancer susceptibility genes**.

**Author:** Grace Stearnes, Cassandra B Nichols... **Publish Year:** 2019

## [Germline BRCA1 and BRCA2 Mutations in Ovarian Cancer ...](#)

<https://insights.ovid.com/obstetrics-gynecology/...> ▼

OBJECTIVE: To estimate the frequency of **BRCA1** and **BRCA2 germline mutations** in women with **nonmucinous epithelial ovarian carcinoma** unselected for a family history of breast or ovarian cancer.

**Cited by:** 97 **Author:** Kasmintan A. Schrader, Jane Hurlburt, St...

## [Germline BRCA1 and BRCA2 Mutations in Ovarian Cancer ...](#)

<journals.lww.com/greenjournal/Pages/articleviewer.aspx?year=2012&issue=08000&article=...>

OBJECTIVE: To estimate the frequency of **BRCA1** and **BRCA2 germline mutations** in women with **nonmucinous epithelial ovarian carcinoma** unselected for a family history of breast or ovarian cancer.

## [High-risk epithelial ovarian cancer patients for ...](#)

<onlinelibrary.wiley.com/doi/10.1111/jog.13287/abstract>

Three **patients** (8.6%) had **MMR gene mutations** (one MLH1 and two MSH2) and one **patient** (2.9%) had other **gene mutation** (MUTYH). Of the 10 **patients with germline mutation**, 40% of **patients** had no significant family history of **cancer**. Conclusion. Up to 30% of **EOC patients** had risk factors for hereditary **ovarian cancer**.

### [High-risk epithelial ovarian cancer patients for ...](#)

[onlinelibrary.wiley.com/doi/10.1111/jog.13287/abstract](https://onlinelibrary.wiley.com/doi/10.1111/jog.13287/abstract)

The objectives of this study were to evaluate the frequency of high-risk **epithelial ovarian cancer** (EOC) **patients** and the frequency of **germline mutation** in these **patients**. Methods A total of 335 **patients** with histologically confirmed **non-mucinous** EOC were included.

**Author:** Seksit Chirasophon, Tarinee Manchan... **Publish Year:** 2017

### [\(PDF\) High-risk epithelial ovarian cancer patients for ...](#)

[https://www.researchgate.net/publication/313624753\\_High-risk...](https://www.researchgate.net/publication/313624753_High-risk...)

High-risk **epithelial ovarian cancer patients** for hereditary **ovarian cancer**: Hereditary **epithelial ovarian cancer**. **Germline mutation** was identified in 28.6% of **patients** (11.4% **BRCA mutation**, 5.7% other HR genes **mutation**, 8.6% **MMR mutation**, and 2.9% **mutation** in other gene). The high cost of genetic testing is an important barrier. Selected **patients** with high-risk factors might be initially ...

### [Evaluation of germline BRCA1 and BRCA2 mutations in a ...](#)

<https://www.sciencedirect.com/science/article/pii/S0090825815301736>

**Germline mutations** in BRCA1 and BRCA2 confer an increased risk of **breast** and **ovarian cancer**, with average cumulative risks of **ovarian cancer** by age 70 years of 39–40% for BRCA1 **mutation** carriers, and 11–18% for BRCA2 **mutation** carriers, compared to ...

### [A universal genetic testing initiative for patients with ...](#)

[https://www.gynecologiconcology-online.net/article/S0090-8258\(17...](https://www.gynecologiconcology-online.net/article/S0090-8258(17...)

Approximately 10–20% of high-grade, **non-mucinous epithelial ovarian**, fallopian tube, and primary peritoneal cancers (HGOC) are hereditary, primarily due to **germline mutations** in the BRCA1 or BRCA2 genes [1–3]. A **mutation** in BRCA1 or BRCA2 confers a 40–66% lifetime risk of **breast cancer** and a 13–46% lifetime risk of **ovarian cancer** in women [4].
