Rectal Small Cell Carcinoma: A Case Report and Review of ...

www.ncbi.nlm.nih.gov › ... › [Case Rep Oncol](#) › v.4(3); Sep-Dec 2011

Sep 21, 2011 · **Case Report.** The rectal biopsy demonstrated a poorly differentiated **malignant** tumour with surface **ulceration** (fig. fig.22). Immunohistochemistry revealed that tumour cells were negative for cytokeratin, LCA (lymphoid marker) and S100 but positive for CD56 (neural cell adhesion molecule, NCAM) and chromogranin,...

ACTH-Secreting Neuroendocrine Carcinoma of the Cecum: ...

<https://www.sciencedirect.com/science/article/pii/S153300281830272X>

We describe a case of ectopic Cushing syndrome due to an ACTH-secreting neuroendocrine tumor of the cecum. • NGS identified mutations in BRAF V600E and TP53. • A literature review produced only 18 other reported cases of this condition.

Colorectal neuroendocrine carcinoma: A case report and review of the literature

Yoshida T *et al.* NEC in the colon

Abstract

BACKGROUND

Colorectal neuroendocrine carcinoma (NEC) is a rare tumor that demonstrates aggressive growth pattern with ingrowth into the tract, metastasis to the other organs, and invasion to the surrounding organs; these clinical characteristics result in poor prognosis. Surgical resection appears as an effective approach; however, because it is difficult to accurately diagnose NEC during the early stage and owing to its aggressive growth pattern, development of a reliable standard chemotherapy regimen and management strategies are essential.

<https://www.sciencedirect.com/science/article/pii/S153300281830272X>

Review of the reports suggested that ectopic ACTH secretion from a **colonic tumor** might be more common in mixed glandular and NETs, including mixed **adenocarcinoma–neuroendocrine carcinoma**. Among **studies reporting** outcomes, the **unadjusted mortality rate** was 77.7%, with median overall survival from presentation of 63 days (range, 17–380 days).
