SPECIFIC COMMENTS TO AUTHORS

WJCC-47402 In the present review, the authors reviewed New Treatment Modalities in Alzheimer's Disease (AD). mainly focusing on the targets of causes of AD. The mini-review is sound, and may provide readers and investigators with good information. However, the mini-review is limited to aspects of the AD pathology. Although the

authors described rehabilitation results achieved with gamma oscillations, additional review on the restoration of neural tissues via regenerative medicine on rejuvenation. Indeed, there are many clinical trials to assess the beneficial effects of stem cells. So, it is strongly recommended that additional review on the stem cells and their secretory factors is required.
