Successful repair of a ruptured Stanford type B aortic ...

<https://www.sciencedirect.com/science/article/pii/S0741521409022691>

Half of all TADs afflicting women aged <40 years are pregnancy related, and most occur late in the pregnancy.¹ To further understand this process, we reviewed our experience with a patient in whom an acute Stanford type B aortic dissection occurred at 26 weeks' gestation ...

Successful repair of a ruptured Stanford type B aortic dissection during pregnancy Christopher L. Stout, MD, Eric C. Scott, MD, Gordon K. Stokes, MD, and Jean M. Panneton, MD, Norfolk, Va We present our experience with an acute Stanford type B aortic dissection in a 25-year-old, 26-week gravid patient without a

Aortic dissection in pregnancy: analysis of risk factors ...

[https://www.annalsthoracicsurgery.org/article/S0003-4975\(03\)00169-3/fulltext](https://www.annalsthoracicsurgery.org/article/S0003-4975(03)00169-3/fulltext)

Aortic dissection during pregnancy is a life-threatening event. Recent studies have revealed similar histologic changes in the wall of the ascending aorta in patients with bicuspid aortic valve disease (BAVD). Based on a review of the literature, including the experience from two institutions, we looked at the patient's characteristics in patients with thoracic aortic dissection during ...
