## Gastroduodenal diseases on the Jos plateau, Nigeria ...

<https://www.sciencedirect.com/science/article/pii/S0035920394904065>

Abstract. Duodenal and gastric ulcers were found in 42 (17.3%) and 12 (4.9%) patients respectively, ratio of 3.5:1. There were 3 patients each with oesophageal and gastric carcinoma. Our findings do not support the belief that the savannah region of West Africa is an area of low prevalence of peptic ulcer disease.
