multiple fingertip injuries and demonstrates the utility of supermicrosurgery in management of these injuries. My opinions are as follows; Title: Main idea is clear and understandable. Abstract: Abstract is accurate, coherent and readable. Introduction: Previous pertinent literature cited and discussed. Therefore, introduction is adequate. Case Report Presentation Method: The case report presentation is clearly presented, consistent, readable and understandable. The article is clearly written, logically organized, interesting and readable.

Thanks to the reviewers for their comments
