#### **SPECIFIC COMMENTS TO AUTHORS**

The manuscript "Ipsilateral breast tumor recurrence in early stage breast cancer patients treated with breast conserving surgery and adjuvant RT: concordance of biomarkers and tumor location from primary tumor to IBTR" submitted by Purswani et al. is a very nice article from a retrospective study that evaluates the primary and recurrent tumor characteristics in patients who experience an in-breast tumor recurrence. This is a good original article and I suggest its publication in World Journal of Clinical Oncology.

#### **SPECIFIC COMMENTS TO AUTHORS**

Juhi M Purswani and co-authors have submitted an interesting case reports about “Ipsilateral breast tumor recurrence in early stage breast cancer patients treated with breast conserving surgery and adjuvant RT: concordance of biomarkers and tumor location from primary tumor to IBTR”. In my personal opinion t is a fluently written manuscript, which provides enough information regarding of the role to choose the nest procedure to treat breast cancer patients, to prevent the neoplasia recurrence.
