Dear authors. Weaknesses and/or deficiencies in the manuscript 1) Authors do not formulate proposed scientific question 2) 1 patient is not enough to formulate such a conclusion. Left trisectionectomy could be just a choice in such patients. Future evaluation is necessary.

This is a very interesting article with regard to a rare case of left hepatic trisectionectomy for perihilar cholangiocarcinoma with a right-sided round ligament. The paper should be accepted for publication in its current form under minor revisions. 1. The Introduction section is too short. The aim of the study should be clear at the end of the paragraph. 2. The structure of the article should be modified. 3. In the Case Report section Ca 19.9 and CEA indications should be more analysed. 4. The number of Figures should be reduced. 5. Grammatical errors should be corrected. 6. Newly published manuscripts should be included.
