

## Language Editing Report

The English writing of the following manuscript was carefully edited by a native English speaker.

**Manuscript title**

Eight key lncRNAs predict hepatitis virus positive hepatocellular carcinoma as the prognostic targets

**First author**

Zi-Lin Huang

**Editing date**

26/3/2019

**Language writing before editing**

- Very poor     Poor     Fair  
 Good     Very good     Excellent

**Recommendation after language editing**

- Submitting to target journal directly  
 Submitting to target journal after minor revision  
 Re-editing required after major revision  
 Not suitable for publication in its current state

**Overview comments**

Minor grammar, wording and interpretation issues were encountered with this paper. Substitutions were made where possible. When in question regarding meaning, a question was placed in the margin. Clarification was requested when interpretation was unclear and suggestions for rephrasing were supplied, when necessary, for ease of the author's consideration and use. Thank you.
