This is a very interesting case with regard to whether gonadotrophin-releasing hormone agonist-induced pituitary adenoma apoplexy and casual finding of a parathyroid carcinoma. Nevertheless, minor revisions could be beneficial. 1. In the Introduction section, additional data about Functioning Gonadotropins Adenomas could be included in the second paragraph. The aim of the study is not clear. 2. Grammatical errors should be corrected. 3. Newly published articles should be included.
