

Dear Reviewers and Editors,

We are so grateful that you have devoted so much of your time working with us and gave us critical suggestion and recommendation on the manuscript. We have carefully gone through the paper and made correction according to your instruction. All of the revisions are listed as follow point to point.

1. English grammar control.

All of the authors have gone through the manuscript and made subtle revisions. Please see highlighted part of the revised manuscript. Also, we have sent the manuscript to a third-party language service agency for polishing. We apologize for any inconvenience brought.

2. The figures must be removed.

Thank you for kindly reminding. The images of mushroom have been replaced from the main manuscript manually with the original high-resolution version by the request of editor. Also, it is mandatory to present the figures and legends in the main text of the manuscript by author guidance.

3. The electrocardiography of patient must be added as figure.

We will upload ECG with prolonged QT interval for publication.

Thank you again for offering the opportunity of potential publication. Your efforts devoted are genuinely appreciated by all of the authors. Hope we could have the chance to provide a platform of discussion on patient care among ED physicians from all over the world.

Yours sincerely,

Qingbian Ma
