SPECIFIC COMMENTS TO AUTHORS

Due to the rarity of the complication reported, it would be better if you emphasize the absence of a correct indication to a panendoscopy in this case. You mention about a voluntary health checkup but I think that a possibly deadly examination must request

SPECIFIC COMMENTS TO AUTHORS

In the manuscript the authors should point out that the dissection of the superior mesenteric artery could already be present and secondarily worsened by endoscopic examination. it is true that the symptomatology appeared after endoscopy but there is
