### Combined Arterial and Venous Thrombosis in Ulcerative ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4866167>

Combined arterial and venous thrombosis in patients with ulcerative colitis is a rare extra vascular manifestation, which motivated the current report. Increased coagulability is a recognised feature of ulcerative colitis with frequency increasing during flares. We report the case of a 42-year-old ...

### Inflammatory Bowel Disease: Perioperative Pharmacological ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3146375>

The perioperative management of patients with Crohn disease (CD) and ulcerative colitis (UC) requires a multifaceted approach involving both traditional and disease-specific considerations. As is true of any surgical patient, a thorough preoperative evaluation is crucial. Of note, the proportion of older patients among those with inflammatory bowel disease (IBD) is increasing, with a consequent ...

<https://jmedicalcasereports.biomedcentral.com/articles/10.1186/1752-1947-7-141> ▾

May 29, 2013 · We describe the case of a woman with an unusual presentation of Wegener's granulomatosis. A 20-year old Caucasian woman presented with the principal feature of a pancolonic, superficial microulceration mimicking severe ulcerative colitis. Our patient was refractory to therapy and had persisting signs of septic shock as well as being at risk of perforation, so we performed a subtotal ...
