

Answering Reviewers

Dear Editors,

Thank you for all your advises, I had learned a lot from your letters. I am sure my manuscript is much better now than before.

I am glad to see that you are interested in the case report. As it is known to all, the guide of the disease is almost the same all over the world, while the patient is quite different from each other. I think this must be the most important reason why this kind of manuscript can draw attention to many readers.

In my latest manuscript, I have re-edited all the requirement you ask and change the figure so that they can be edited. I hope they can meet your requirement.

Thank you so much and looking forward to hearing from you soon.

Yours,

Qian Lin
