SPECIFIC COMMENTS TO AUTHORS

This is an interesting case report describing atypical cutaneous lesions in a patient with advanced-stage Hodgkin's lymphoma. I have some comments as outlined below: 1) The pathological figure should have the epidermis orientated horizontally. 2) High

power histological figures showing Reed-Sternberg cells should also be provided. 3)
Images for some of the special stains (CD30, CD15, PAX5 and MUM1/IRF4) should also
be shown in the manuscript.
