**Review time:** 14 Days and 11 Hours

**Dear reviewer:**

I have read your review and modified my manuscripts according to your opinion.

- 1、 No modification opinion.
- 2、 I have corrected the sentence: **Most of its clinicopathologic** characteristics are similar to single lesions.
- 3、 You are right, in INTRODUCTION, I made a wrong word, so I correct the sentence (are **not** associated with Helicobacter pylori).
- 4、 I have deleted the date (on December 16, 2018).
- 5、 May be our sharpness of the picture needs to be improved. The following pictures are original pictures, I think the first picture shows a irregular MVP and irregular MSP with a DL, so I haven't modified it, I would like to hear your advice again. The second picture show a regular MVP, **so I correct.**

6、 I have corrected the expression .( Whether multiple GA-FG have the same pathogenic mechanism,we have no evidence,more data are required to understand the pathogenesis of multiple GA-FG )

Thank you for your opinion

Yours sincerely  
Chen Ou
